Method

- Define the process for using the Community Readiness Model
  - Identifying the issue
  - Defining the "community"
  - Conducting "key respondent" interviews
  - Scoring the interviews to determine the readiness level
- Explain the dimensions of community readiness
- Briefly describe the process of scoring

Results

- Averaged combined scores table
- Calculated scores
  - Create an Average Readiness Scores by Dimension table
  - Explain what each score represents by Dimension
- Overall Stage of Readiness
  - Total Calculated Score
  - Stage of Readiness

Figure 1. Average Dimension Scores

Average Readiness Scores by Dimension

Dimension	Stage Score
(A) Community Efforts	3.14
(B) Community Knowledge of Efforts	3.14
(C) Leadership	7.00
(D) Community Climate	2.86
(E) Community Knowledge about the Issue	3.07
(F) Resources Related to the Issue	4.29
(G) Community Involvement	3.71

Develop Strategies

- Analyze community readiness findings
  - Readiness among all dimensions must be around the same level
  - If one or more of the dimensions have a lower score than others, efforts should be focused on strategies to improve those dimensions first
- Actions for Raising Community Readiness Levels
  - Example actions are provided as a tool for each stage of readiness
