Federal Reporting Requirements

SAMHSA requires that sub-recipients report at least one consumption indicator, one consequence indicator, and one intervening variable for each goal (i.e., six measures per sub-recipient). *OhioMHAS will provide data to sub-recipient communities regarding consequence data.* Sub-recipients are required to collect consumption indicators and intervening variables on an annual basis. Community Outcome data should represent the areas served/reached by SPF-PFS implementation and interventions.

Deadline

Due to the fact that the FFY17 data is being collected at different times in different communities, we cannot provide a definite deadline. However, you cannot move forward with the Needs Assessment Process without these data. An ideal deadline would be 3-4 weeks after you receive your FFY data. On the Sub-Recipient Calendar, we have listed **11/30/2017** as the “last call” due date to get your quantitative needs assessment report prior to January 31, 2018.
